SARA MARÍA OJEDA LÓPEZ

Pasto, Colombia • +57 315 855 06 83 • saramariaojeda9559@gmail.com

Software Engineering student in the final semester with 2+ years of full-stack development experience. Skilled in backend and frontend technologies. Hackathon winner and Junior Researcher, with experience in a university research group developing innovative and socially impactful projects.
Strongly driven by discipline, resilience, and continuous learning, with a passion for technology and innovation.

PROFESIONAL EXPERIENCE

Universidad Cooperativa de Colombia — Pasto, Colombia
University Research Group (miembro active semillero intitech) — *Oct 2025 – Jan 2026*
Junior Researcher – Full Stack Developer – Project Lead– Software Architect

- Developed an innovative software solution focused on the analysis and treatment of phobias, integrating technology to support mental health research and social impact.
- Designed and implemented the system architecture, including backend logic, frontend interfaces, and database modeling
- Applied software engineering principles to ensure scalability, usability, and data integrity within the research platform using Extreme Programming (XP) methodology, applying iterative development, continuous feedback, and frequent releases.
- Collaborated with interdisciplinary teams to align technical development with research objectives and ethical considerations
- Validated the project through testing and iterative improvements, ensuring functional reliability and research feasibility.

EDUCATION

Universidad Cooperativa de Colombia, Campus Pasto — Pasto, Colombia
Bachelor's in software engineering (Ongoing) — *2023 - 2026*
Active member of university research groups (Semillero de Investigación), working on innovative and socially impactful project.

CINAR Sistemas — Pasto, Colombia
Technical Degree in Systems *(Ongoing)* — 2025 – 2026

CINAR Sistemas — Pasto, Colombia
Technical Degree in Electronics — 2022 – 2023

SKILLS

- Languages and Frameworks: Python (Django), Java (Spring Boot), JavaScript (Node.js, Express, React, Svelte, Angular, Next.js), Typescript, Flutter.
- Data bases: PostgreSQL, MySQL, MongoDB, Firebase, Supabase.
- DevOps: Docker, Git, GitHub.
- Other Technologies: Microservices, APIs REST.
- Design & UX/UI: Skilled in developing web and mobile interfaces focused on performance, usability, and seamless user experience.
- Methodologies: Scrum, XP, Agile practices, code reviews, and version control with Git.
- Security: Experience with virtualization and isolated environments for testing and development, understanding of basic security concepts, access control, and system-level protection, supported by solid theoretical training in cybersecurity.
- Data Analysis: Experience in data collection and analysis using PySpark for data processing, Scrapy and Selenium for web data extraction, and Power BI for data visualization and reporting.
- Game Development & 3D: Unity (C#), Blender.
- IoT & Embedded Systems: Arduino, ESP32/ESP8266, basic IoT architectures, sensor integration, and data communication.
- Soft Skills: Responsible, strong communication skills, fast learner, good teamwork, and adaptability in academic and technical environments

ACHIEVEMENTS

- Winner – PotenCIA Summit Hackathon 2024 — Developed a functional prototype to optimize medicine search processes.

CERTIFICATIONS

- Fortinet NSE 4 – FortiOS 7.6 Administrator, Fortinet Training Institute (Pass, July 2026).
